## About Our Buildings

Eversafe Buildings offers high quality, easy-to-assemble steel garage kits, metal carport kits, steel buildings, sheds and other types of manufactured and pre-engineered metal buildings. Manufactured nationwide with American made steel, using American labor, our buildings are used by thousands of residential and commercial customers around the world.

Our metal garage kits, RV covers, steel buildings and steel carports are of the highest quality available and are designed and engineered with the consumer in mind. All framing is hot dipped galvanized which gives you the best protection from rust through and corrosion. Easy to assemble, strong and designed to last, Eversafe Buildings offers the best in durability and convenience, while maintaining a price that's easy on your wallet.

We not only offer buildings to cover and protect your automobiles, RVs, boats and heavy equipment, we also supply steel buildings for every application. From residential to commercial, agricultural to industrial, we have it all!

## Building Features

- 13 attractive colors to choose from
- Heavy duty durable design
- Customizable for your unique requirements
- Fast reliable construction
- Delivery and installation included
- Low cost future expansion option

## Garage Building Features

### Custom Design & Build Your Garage Building

Eversafe metal garage kits are manufactured using galvanized steel, increasing protection against rusting and corrosion. With the flexibility of full garage building customization, you can design your garage based on your own specifications. Choose the width, length, height, roof style, even the color of the roof, walls, trim and doors.

#### Features You Can Customize:

- Side walls and end walls
- Roof style
- Wall, roof, trim and door colors
- Add windows, walk doors, garage doors and other accessories
- Insulation
- Attractive wainscot for two-tone colors
- Lean-to's for low cost covered storage space

## Garages

Single car garage with a standard roof with horizontal sheeting and optional garage door.

Large single car garage with an upgraded roof with boxed eave, upgraded vertical sheeting and optional garage door and walk door.

2-car garage featuring an upgraded vertical roof with boxed eave, optional side entry garage doors (with architectural accent angled corners) and a walk door.

3-car garage with an upgraded vertical roof with boxed eave, optional side entry garage doors and a walk door. This garage also has 3 optional windows which helps add natural sunlight inside the building.

Design your own easily customizable garage based on your size and design. Ask one of our building specialists for details.

## Carports

Eversafe carports can meet every residential need with single car, 2-car and 3-car models. Custom commercial models are also available up to 40' wide

2-car Carport with a standard roof with horizontal sheeting and optional gable sheeting on both ends.

2-car carport featuring an upgraded roof with boxed eaves, sheeted gable ends and partial paneling on the sides.

Custom carport designed with an upgraded roof with boxed eaves, optional partial vertical paneling, optional walk door and small garage door that lead to a small enclosed storage area.

If you're looking to protect an investment as important as your car, truck, motorcycle or any other type of vehicle, then you've come to the right place. Protect your investment and save big with an Eversafe carport. We provide everything you'll need to get your building delivered and built in the quickest time possible, and our low prices are easy on your wallet. Call one of our experienced building specialists at 1-800-374-7106 today to get more information on your carport needs.

## Carport Building Features

Eversafe Buildings specializes in high quality metal Carports. Unlike other carports which are made from tarp and are pinned together, Eversafe delivers and installs all steel carports that can be built on asphalt, concrete or even directly on the ground. Our buildings are designed to last for years and upgraded models come with 12 gauge steel framing featuring a 20 year rust through warranty.

Carport Models:

- Single Car
- 2-Car
- 3-Car
- Custom/Commercial

## Garage & Carport Hybrid Features

Eversafe Buildings offers the highest quality and most economical combination garage and carport steel buildings on the market today. Our buildings are completely customizable, meaning we can manufacture your building based on your own specifications. You can choose from one of our economical standard designed steel garage kits or we can build it based on your own specifications. Eversafe buildings are pre-engineered in our network of factories to meet your exact specifications, and then shipped to your site and put up.

Our prefabricated metal buildings are quick and easy to build. Typical stick construction can take weeks or months to complete, requiring specialized labor and materials. With an Eversafe building all the drilling, cutting and welding is done in the factory. This means less on-site labor and less material waste. And our buildings do not require the maintenance a wood building needs.

## RV SHELTERS

Our standard RV shelter buildings come with strong 14 gauge steel framing. Our upgraded steel buildings come with 12 gauge steel framing and a 20 year rust through warranty.

Your steel RV shelters can be designed with one of three different roof styles: Regular (Horizontal panels) with rounded eaves, A-Frame (or Boxed eave) with Horizontal panels, and A-Frame with vertical panels. And for little additional cost we can design your building with 14' walls.

Fully enclosed RV shelters are also available giving your expensive investment complete coverage and protection from the elements as well as damage from falling debris and vandalism.

Protect your investment and save with Eversafe Buildings. We provide all the materials you need to get your steel RV shelter delivered quickly and efficiently. We make the process a snap! From ordering your RV shelter up until your building is delivered and erected, we'll walk you through the entire process to make it as simple and painless as possible. Decades in the steel building industry ensures a smooth and effortless experience as we've simplified the process for you.

## RV Shelter Building Features

**Putting up an RV shelter to protect your investment has never been easier or cheaper.**

If you're looking to protect your expensive motorhome then you've come to the right place. Eversafe Buildings offers high quality metal RV shelters and RV storage buildings at the best prices. Unlike RV shelters that are covered in cheap vinyl tarps and are just pinned together, Eversafe Buildings delivers and installs high quality steel RV shelters that are built to last and can be built directly on the ground, on concrete or even on pavement. Our RV shelters will protect your RV, motorhome or camper for years to come, saving it from the harsh elements Mother Nature has to offer. High winds, rain, snow, hail, ice and even extreme heat are no match for our buildings.

## Metal Barns and Agricultural Building Features

Eversafe Buildings offers the highest quality steel barns and agricultural buildings with the most economical pricing in the industry. Our metal barns are customizable so they can be manufactured based on your own design or plans.

You can choose from our economical standard barn or add options to match your exact needs. Eversafe steel barns are pre-engineered and manufactured to meet your exact specifications then shipped to your site ready to be put up. Prefabricated metal buildings are quick and easy to assemble when compared to traditional stick framed construction which requires specialized labor, can take weeks or even months to build and creates jobsite material waste.

## Standard Building Features

This section contains standard features included with our buildings as well as items you can choose as options when designing your new steel building. Some are designed for practical applications while other are purely cosmetic.

AMERICAN MADE-AMERICAN PROUD

1-800-374-7106

## Standard Building Features

### FREE DELIVERY

Every Eversafe steel building is delivered to your door at no charge. Whether your building is a small carport or a large steel garage we will deliver it to your door and offload all of the building materials.

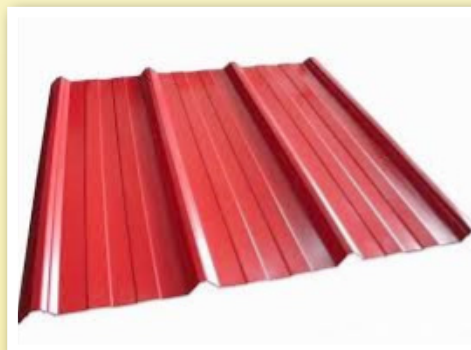

### FREE INSTALLATION

Included in the price of every Eversafe steel building is installation. Let the experts handle the heavy lifting for you. Once the building materials are delivered and offloaded our crew will get right to work building your new steel building.

### STEEL FRAMING

Our standard box beam framework comes in strong 14 gauge galvanized steel.

### ROOF AND WALL SHEETING

Standard high tensile commercial roof and wall sheeting is available in 13 beautiful standard colors. Non-standard colors and color matching are also available upon request.

## Standard Building Features

### ROOF STYLE

Our standard roof has rounded eaves and horizontal 29 gauge sheeting.

### CORNER/LEG/PEAK BRACES

Corner, leg and peak braces, are U-shaped channels used to reinforce the structure of the building. Every Eversafe building includes braces on every bow on the underside of the crown of the building.

### ANCHORS

#### Rebar Anchors

All Eversafe steel buildings come with standard 1/2" x 32" rebar spikes used for ground installation.

#### Concrete Wedge Anchors

Concrete anchors are hammer drilled into your existing slab as opposed to being "wet set".

#### Asphalt Anchors

These anchors are an upgrade and are available for buildings installed on asphalt. Asphalt anchors are barbed offering a superior hold over the rebar anchor.

## Standard Building Features

This section contains standard features included with our buildings as well as items you can choose as options when designing your new steel building. Some are designed for practical applications while other are purely cosmetic.

## Building Options

### GARAGE DOORS

Eversafe Buildings offers roll up style garage doors which retract into a small cylinder above the door opening. They come in a variety of sizes from 6' x 6' to 12' x 12'. We also offer commercial sized doors that come with a chain.

### WALK DOORS

Eversafe walk doors come in 2 sizes; 32" wide x 72" high and 36" wide x 80" high and include a 10" x 10" window.

### WINDOWS

Eversafe heavy duty windows come 30" x 30". They give your steel building a more appealing and finished look, and allow natural light into your building.

### INSULATION

Eversafe Buildings offers insulation for your metal building. Installing insulation in your steel building can add many benefits:

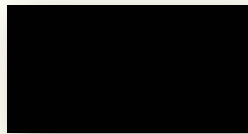

- Blocks 94% of Radiant Heat.
- Great way to moderate the temperature inside your building
- Protects your valuables from extreme cold and/or heat.
- Reduces heat flow which lowers your cost for heating or cooling.
- Reduces condensation; which helps to avoid mold buildup and metal corrosion.
