About Eversafe Buildings

Eversafe Buildings has more than 20 years' experience supplying large industrial, agricultural and commercial metal buildings. Our custom LARGE SPAN trusses are engineer certified and reinforced with steel roof purlins and vertical sheeting. They are fully engineered to meet or exceed virtually any wind and snow load to pass your local structural building codes. Eversafe LARGE SPAN buildings can be custom designed for any application and include many standard features not included with buildings from other companies. Attention to detail and quality with every installation makes Eversafe's commercial metal buildings your best choice over any other.

Top Quality Metal Buildings

Eversafe Buildings supplies top quality large span metal buildings that can be used for a multitude of applications requiring large spans. Whether you need a storage building, a large agricultural building, a building for manufacturing, a warehouse building, or any type of commercial structure, we have you covered. Eversafe's commercial large span buildings are available nationwide from 32' to 120' wide at the most competitive prices.

Our buildings are manufactured using only the latest technology, and state-of-the-art machinery under strict quality control procedures. We deliver and install every building with pride, using qualified factory trained and certified erectors for the best workmanship. All Eversafe frames are galvanized for superior protection against corrosion. Our steel structures are engineer certified and can be designed to meet any building code. Quality, durability, strength and honesty are what makes Eversafe the best choice for all your building needs.

Our commitment to product quality, excellence in customer service, and giving our customers the best prices is second to none. Our customer's satisfaction is our number one priority and we stand by our products with a 100% satisfaction guarantee.

Uses For Our Large span Buildings

Uses for our large span buildings are endless. Whether you're using your building for agricultural storage, equipment storage, industrial manufacturing or warehousing, Eversafe has you covered. Our clear span metal buildings are designed to give you the freedom you need to design the interior of your building any way you like.

Commercial Buildings

Eversafe's line of large span structures are perfect for any commercial garage steel building project.

Our large span buildings can easily be built tall enough to fit over the road trucks and oversized equipment.

BUILT SAFE BUILT STRONG BUILT TO LAST

Our buildings are versatile and can be designed with open walls like this pavilion style metal building.

Wide openings can be engineered to allow easy access for oversized vehicles and equipment.

Metal Industrial Buildings

This Industrial storage building was designed with a large opening to allow for oversized trucks and tractors.

Large garage doors can be added to end walls or sidewalls allowing for easy in and out access for large equipment like forklifts and other heavy machinery.

BUILT SAFE BUILT STRONG BUILT TO LAST

Our versatile industrial metal building kits can be installed right next to existing buildings and walls.

BUILDING FEATURES

Eversafe Buildings can install any size structure you need. Select from our many standard styles or we can build based on your own custom design. We can handle any industrial application from small utility buildings used to cover wells and generators to huge recycling centers, warehouses and manufacturing facilities. Our buildings are all steel and use durable finishes and coatings so that your building looks great for years to come.

Eversafe's large span industrial buildings are commonly used for welding shops; sawmill operations, refineries and trucking terminals. Whatever your application is, we will supply and construct your building in the shortest time possible.

AMERICAN MADE-AMERICAN PROUD

1-800-374-7106

BUILDING FEATURES

Eversafe's large span agricultural buildings are manufactured using the highest quality steel, coatings and finishes. This ensures you will receive the strongest and most durable farm metal building available in the industry. Our farm building kits are engineered to match your custom design and specifications then delivered right to your jobsite with installation starting the moment the building is delivered.

You can select a standard metal barn which is the most economical and then choose which options and features you want to incorporate into the design, or you can submit your own custom plans, the choice is yours. Eversafe's prefabricated metal building kits are erected quickly saving you tremendously on labor costs and eliminating the material waste that is typical on a wood-frame construction. The heavy duty hot dip galvanized steel frames offer long term protection for your building against structural corrosion and the high maintenance costs caused by wood rot or member warping.

AMERICAN MADE-AMERICAN PROUD

Large Span Agricultural Buildings

Wide open centers with lower height lean-tos are perfect for metal horse barns.

Our flexible design allows for metal barns to be constructed that have wide and tall door openings.

BUILT SAFE BUILT STRONG BUILT TO LAST

Here is an Eversafe agricultural shop metal building with a rollup door, walkdoor, window and a loafing shed attached.

Large Steel Warehouse Buildings

And Storage Buildings

This metal storage building is configured with one sidewall rollup door and one walk door.

Pavilion style storage metal buildings are great for areas that are hot most of the year. These are a great way to protect your expensive investments

BUILT SAFE BUILT STRONG BUILT TO LAST

This simple design is one of the most common configurations for storage steel buildings with one large garage door centered in the endwall.

BUILDING FEATURES

Eversafe's large metal warehouse buildings are designed to meet your exact size specifications with a large range of door configurations to choose from. One or more rollup doors can be added to sidewalls and end walls and walk doors can be placed where you need them. We supply structures that have open wall conditions such as storage buildings with one or both end walls open eliminating the need for garage doors. Another common configuration is to have an enclosed metal storage building with a lean-to that has an open side for easy vehicle access.

AMERICAN MADE-AMERICAN PROUD

1-800-374-7106

BUILDING FEATURES

Large metal garages and workshop buildings are the most popular of our customer's applications for Eversafe large span buildings. Our large span design allows for several garage doors and walk doors to be placed on the walls. Eversafe's clear span design which has no interior support posts to get in the way lets you have a lot more flexibility in the design of your floor plan. As always you have your choice of a variety of colors for the walls, roof and trim.

Customizable Options:

Colors : Sidewalls, end walls, trim and doors

Accessories : Windows, walk doors, rollup doors, insulation

Special Features : Two-tone wainscot

Building Extensions : Roof Only and Enclosed Lean-Tos, Roof Only Porches

*Please note: Customers must provide a lift during the installation of our large span buildings.

Building Options

GARAGE DOORS

Eversafe Buildings offers roll up style garage doors which retract into a cylinder shape above the door opening. They come in a variety of sizes from 6' x 6' to 10' x 10'. We also offer commercial sized doors that are chain driven. These doors are available in sizes that range from 12' x 12' up to and 21' x 18'.

WALK DOORS

Eversafe walk doors are 36" wide x 80" high and are available with and without a 10" x 10" diamond shaped window.

WINDOWS

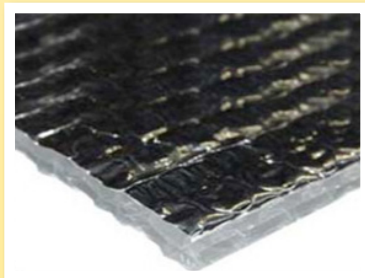

Eversafe heavy duty windows come 30" x 30" and will give your steel building a more appealing and finished look and are a great feature to allow natural light into your building without the need for electricity.

INSULATION

Eversafe Buildings offers insulation for your metal building. Installing insulation in your steel building can add many benefits:

- Blocks Radiant Heat.
- Great way to moderate the temperature inside your building
- Reduces heat flow which lowers your cost for heating or cooling.
- Reduces condensation; which helps to avoid mold buildup and metal corrosion.

*Not all door sizes are available in all areas

BUILDING FEATURES

Eversafe offers standard metal building accessories such as garage doors, walkdoors, windows and insulation. You can place the rollup doors in several places on your building walls and they can be ordered in a range of colors. There are plenty of products that are used in metal garages and workshops that you can find online and at local retailers. Check out our FREE ACCESSORIES GUIDE with a description and pictures of many of these products as well as where to buy them.

Call us today at 1-800-374-7106 for prices and more information on our metal buildings and accessories.

AMERICAN MADE-AMERICAN PROUD

1-800-374-7106

Eversafe's steel buildings are manufactured using only the finest grade American made steel, no cheap inferior imported materials. The factories only employ 100% American labor and every building is made with conscientious rigid quality control.

AMERICAN MADE-AMERICAN PROUD
